Professional Summary

Analytical Computer Science and Engineering (CSE) student with a strong core in **Data Structures & Algorithms (DSA)** and an engineering-first approach to software development. Experienced in translating algorithmic logic into functional, optimized software, with practical proficiency spanning deep learning models and full-stack applications. Skilled at writing clean, efficient code across Python, Java, and C++ to solve complex backend and programmatic challenges.

Education

Vardhaman College of Engineering

Shamshabad, TS

Bachelor of Technology in Computer Science and Engineering

2023 – 2027

- Current CGPA: **9.66/10.00**

Sri Chaitanya Junior College

Kukatpally, TS

Intermediate (MPC), Telangana Board of Intermediate Education (TGBIE)

2021 – 2023

- Percentage: **97.8%**

Sri Chaitanya School

Nacharam, TS

Tenth Class, Telangana Board of Secondary Education (BSET)

2021

- CGPA: **10.00/10.00**

Experience

Mass Mutual

January 2025 – October 2025

MERN Stack Intern

Hyderabad, Telangana

- Developed a comprehensive Library Management Portal using a Full-Stack architecture to streamline resource tracking, digital cataloging, and user borrowing workflows.
- Built a dynamic and responsive user interface using React.js, implementing functional components and hooks for efficient state management and a seamless user experience.
- Designed and implemented RESTful APIs to manage complex book inventories, secure user authentication, and real-time transaction logs.
- Optimized database performance by designing a relational schema in SQL, ensuring data integrity for concurrent user access and efficient retrieval of multi-level book categorizations.

Edunet Foundation x Microsoft x SAP

May 2024 – Aug 2024

AI & ML Research Intern (TechSaksham Program)

Hyderabad, Telangana

- Developed an **AI-powered Resume Screening and Ranking System** to automate candidate evaluation using Natural Language Processing (NLP) techniques.
- Built the cross-platform mobile interface using **Dart and the Flutter framework** to allow HR professionals to access AI-driven insights on iOS and Android devices.
- Integrated **Google Firebase** as a backend service to manage real-time user data, resume storage, and secure authentication across multiple platforms.
- Collaborated with a technical team mentored by experts from **Microsoft and SAP** to implement Git-based version control and agile task management.

Projects

AI-Driven Smart Demand Forecasting System | Python, TensorFlow,

Jan 2026 – march 2026

LSTM | GitHub

- Developed a deep learning framework using **LSTM and GRU architectures** to predict 14-day retail demand with high precision, capturing non-linear seasonal patterns.
- Engineered a mathematical optimization layer to calculate **Dynamic Reorder Points (ROP)** and **Safety Stock**, reducing inventory risks for small-scale retailers.
- Built an interactive dashboard in **Streamlit** featuring a Profitability Matrix and Revenue Breakdown visualizations for real-time business intelligence.
- Optimized model performance on low-resource hardware to support the "Democratized AI" initiative for local businesses.

- Architected a responsive **Library Management Portal** using React.js, streamlining the digital tracking, borrowing, and indexing of academic resources.
- Implemented efficient client-side routing and component-driven architecture to optimize search, filtering, and real-time book availability updates.
- Designed a clean, intuitive user interface leveraging CSS frameworks to enhance accessibility and user experience across diverse devices.
- Utilized version control with **Git** to manage iterative code deployments, ensuring modular structure and code maintainability.

Technical Skills

Languages: Python, Java, C/C++, JavaScript, SQL (MySQL, Oracle), HTML/CSS

Libraries/Frameworks: TensorFlow, Keras, NumPy, Pandas, Matplotlib, Scipy, React.js, Bootstrap

Cloud & Tools: AWS (EC2, S3), Google Cloud Platform, Jenkins, Git/GitHub, Android Studio, VS Code

Databases: MongoDB, MySQL, Oracle SQL

Relevant Coursework

Core Computer Science: Data Structures & Algorithms (DSA), Operating Systems (OS), Database Management Systems (DBMS), Object-Oriented Programming (Java/C++), Computer Organization & Architecture.

Specialized Analytics: Machine Learning, Deep Learning, Cloud Computing (AWS), Software Engineering, Cybersecurity Protocols.

Mathematical Foundations: Probability and Statistics, Discrete Mathematics, Design and Analysis of Algorithms.

Awards & Achievements

- **LeetCode 50-Day Challenge:** Successfully completed the 50-day daily coding challenge, demonstrating consistency in problem-solving and algorithmic thinking. (ID: M BhanuTeja)
- **HackerRank Badges:** Earned **6 Gold/Silver badges** across various domains including Problem Solving, Java, and Python. (ID: bhanu)
- **LeetCode Proficiency:** Achieved 2 specialized badges for consistent performance and topic mastery in Data Structures and Algorithms.
- **Academic Excellence:** Secured a perfect **10/10 GPA** in Secondary School and **97.8%** in Intermediate Board Examinations.

Extracurricular Activities

- **Student Leadership:** Represented peer groups in college technical committees, facilitating communication between students and faculty regarding academic resources and lab requirements.
- **Technical Mentorship:** Offered peer-to-peer support in coding bootcamps, helping junior students understand core Java and Python concepts.
- **Event Coordination:** Actively participated in organizing department-level technical fests and hackathons.
